

## **RCW 64.38.065 Reserve account and study. (Effective January 1, 2012.)**

(1) An association is encouraged to establish a reserve account with a financial institution to fund major maintenance, repair, and replacement of common elements, including limited common elements that will require major maintenance, repair, or replacement within thirty years. If the association establishes a reserve account, the account must be in the name of the association. The board of directors is responsible for administering the reserve account.

(2) Unless doing so would impose an unreasonable hardship, an association with significant assets shall prepare and update a reserve study, in accordance with the association's governing documents and this chapter. The initial reserve study must be based upon a visual site inspection conducted by a reserve study professional.

(3) Unless doing so would impose an unreasonable hardship, the association shall update the reserve study annually. At least every three years, an updated reserve study must be prepared and based upon a visual site inspection conducted by a reserve study professional.

(4) The decisions relating to the preparation and updating of a reserve study must be made by the board of directors in the exercise of the reasonable discretion of the board. The decisions must include whether a reserve study will be prepared or updated, and whether the assistance of a reserve study professional will be utilized.

## **RCW 64.38.070 Reserve study — Requirements.**

(1) A reserve study as described in RCW [64.38.065](#) is supplemental to the association's operating and maintenance budget. In preparing a reserve study, the association shall estimate the anticipated major maintenance, repair, and replacement costs, whose infrequent and significant nature make them impractical to be included in an annual budget.

(2) A reserve study must include:

(a) A reserve component list, including any reserve component that would cost more than one percent of the annual budget of the association, not including the reserve account, for major maintenance, repair, or replacement. If one of these reserve components is not included in the reserve study, the study should provide commentary explaining the basis for its exclusion. The study must also include quantities and estimates for the useful life of each reserve component, remaining useful life of each reserve component, and current major maintenance, repair, or replacement cost for each reserve component;

(b) The date of the study, and a statement that the study meets the requirements of this section;

(c) The following level of reserve study performed:

(i) Level I: Full reserve study funding analysis and plan;

(ii) Level II: Update with visual site inspection; or

(iii) Level III: Update with no visual site inspection;

(d) The association's reserve account balance;

(e) The percentage of the fully funded balance that the reserve account is funded;

(f) Special assessments already implemented or planned;

(g) Interest and inflation assumptions;

(h) Current reserve account contribution rates for a full funding plan and baseline funding plan;

(i) A recommended reserve account contribution rate, a contribution rate for a full funding plan to achieve one hundred percent fully funded reserves by the end of the thirty-year study period, a baseline funding plan to maintain the reserve balance above zero throughout the thirty-year study period without special assessments, and a contribution rate recommended by the reserve study professional;

(j) A projected reserve account balance for thirty years and a funding plan to pay for projected costs from

that reserve account balance without reliance on future unplanned special assessments; and

(k) A statement on whether the reserve study was prepared with the assistance of a reserve study professional.

(3) A reserve study must also include the following disclosure: "This reserve study should be reviewed carefully. It may not include all common and limited common element components that will require major maintenance, repair, or replacement in future years, and may not include regular contributions to a reserve account for the cost of such maintenance, repair, or replacement. The failure to include a component in a reserve study, or to provide contributions to a reserve account for a component, may, under some circumstances, require you to pay on demand as a special assessment your share of common expenses for the cost of major maintenance, repair, or replacement of a reserve component."

### **RCW 64.38.075 Reserve account — Withdrawals.**

An association may withdraw funds from its reserve account to pay for unforeseen or unbudgeted costs that are unrelated to maintenance, repair, or replacement of the reserve components. The board of directors shall record any such withdrawal in the minute books of the association, cause notice of any such withdrawal to be hand delivered or sent prepaid by first-class United States mail to the mailing address of each owner or to any other mailing address designated in writing by the owner, and adopt a repayment schedule not to exceed twenty-four months unless it determines that repayment within twenty-four months would impose an unreasonable burden on the owners. Payment for major maintenance, repair, or replacement of the reserve components out of cycle with the reserve study projections or not included in the reserve study may be made from the reserve account without meeting the notification or repayment requirements under this section.

### **RCW 64.38.080 Reserve study — Demand for preparation and inclusion in budget.**

(1) When more than three years have passed since the date of the last reserve study prepared by a reserve study professional, the owners to which at least thirty-five percent of the votes are allocated may demand, in writing, to the association that the cost of a reserve study be included in the next budget and that the study be prepared by the end of that budget year. The written demand must refer to this section. The board of directors shall, upon receipt of the written demand, provide the owners who make the demand reasonable assurance that the board will include a reserve study in the next budget and, if the budget is not rejected by a majority of the owners, will arrange for the completion of a reserve study.

(2) If a written demand under this section is made and a reserve study is not timely prepared, a court may order specific performance and award reasonable attorneys' fees to the prevailing party in any legal action brought to enforce this section. An association may assert unreasonable hardship as an affirmative defense in any action brought against it under this section. Without limiting this affirmative defense, an unreasonable hardship exists where the cost of preparing a reserve study would exceed five percent of the association's annual budget.

(3) An owner's duty to pay for common expenses is not excused because of the association's failure to comply with this section or this chapter. A budget ratified by the owners is not invalidated because of the association's failure to comply with this section or this chapter.

### **RCW 64.38.085 Reserve account and study — Liability.**

Monetary damages or any other liability may not be awarded against or imposed upon the association, the officers or board of directors of the association, or those persons who may have provided advice or assistance to the association or its officers or directors, for failure to: Establish a reserve account; have a current reserve study prepared or updated in accordance with the requirements of this chapter; or make the reserve disclosures in accordance with this chapter.

### **RCW 64.38.090 Reserve study — Exemptions.**

An association is not required to follow the reserve study requirements under RCW [64.38.025](#) and RCW [64.38.065](#) through [64.38.085](#) if the cost of the reserve study exceeds five percent of the association's annual budget, the association does not have significant assets, or there are ten or fewer homes in the association.
