

## Water Committee Report

3/27/2021

There has been no water committee meeting since early 2020. Water system has been running smoothly except for a couple of minor leaks, substantial one at 221 Olympic Dr that caused a portion of the water system to be shut down for several hours. The leak was repaired by Caseco and drainage damage was repaired by Jose Raymundo Landscaping. A large pothole was discovered in the easement at 10E MLDE. Pothole issue was repaired by Mason County. Contract for well site maintenance in 2021 was awarded to Jose Raymundo, who did the work for us in 2020.

Public Water System Permit was approved and expires August 2021.

In case you want to check testing results for our water system:

Google Sentry Internet, click on the Washington state site and follow the prompts to Sentry. Enter either Paradise Estates or the ID number where required to get to our water system 66125T is our ID # Click on samples and you can see every test result DOH has on file. We monitor lots of contaminants on a variety of schedules. Pick the one you're interested in and click on the sample ID link
