

Paradise Water System Report
November 2021

Since the last report the water system has operated without issue. The well sites have been cleaned up and debris removed. A meeting with a painting contractor to do the pump house piping has been delayed until my return from Arizona. We've acquired the hoses and fittings needed to divert the water from flushing the hydrants and blow offs. We'll be looking for volunteers to help with valve exercising and hydrant flushing when the time comes.

For the Water System's financial information please see the Treasurer's report.
