Subject: Paradise Estates Water System, ID #66125, Mason County; Well No. 3 Source Approval, ODW Project #07-1013

Dear Mr. Hearn:

The construction documents, project report, and amendments received by the Office of Drinking Water (ODW) on October 25, November 26, December 3, and December 20, 2007, for the above project have been reviewed and in accordance with the provisions of WAC 246-290 are **APPROVED with the provision that the well is not allowed to be put on line until the radionuclide test has been taken and the results are satisfactory.** The approval issued herein is based on conformance with current standards outlined in WAC 246-290, revised effective July 3, 2004. Future changes in rules may be more stringent and require facility modification or corrective action.

As required in WAC 246-290-120(5), within sixty days following the completion of and prior to use of the above project or portions thereof, the enclosed construction report must be completed by a professional engineer and returned to the ODW.

The number of approved connections and equivalent residential units are not changed with this approval. Please note this water system is expected to permit additional new connections in a manner consistent with this project and planning document so that physical capacity and exempt well limitations are not exceeded.

The Department of Ecology (Ecology) reviewed the new source submittal information and issued its comments on November 20, 2007. The ODW provided a copy of their response for your

information and response on November 29, 2007. The Paradise Service Association has subsequently submitted a Showing of Compliance to Ecology.

Regulations establishing a schedule of fees for review of planning, engineering, and construction documents were adopted July 1, 2007 (WAC 246-290-990). An itemized invoice for \$525 is enclosed.

If you have questions, please contact me at (360) 236-3036 or by e-mail at frank.meriwether@doh.wa.gov.

Sincerely,

Frank Meriwether, P.E.
Office of Drinking Water Regional Engineer
