

Water Committee Report

18 January 2025

William James, Water Committee Chair, PSA Vice President

During the last two months, 64 days (October 29th to January 1st), our well pumps pumped a total of 1,505,020 gallons out of the ground.

The highest usage was 3,970 cubic feet (29,698 gallons), averaging 464 gallons per day.

Two accounts exceeded their allotment. 15 accounts are past due, and two are pending service suspension. One account is suspended.

Our five water system reserve CDs matured at the end of December netting a total of \$29,279.50 in interest. The monies have been reinvested into new CDs at 3.92% interest for 12 months.

Members are urged to turn off their water at the meter if they intend to leave for an extended period. Turning off your water will help prevent leaks and Thousands of dollars in water charges and possible costly repairs.

I am currently on travel to San Diego for work until April. Please report any water system problems promptly to NWS and myself.
