PSA Marina Report

The boat slip numbers have now been installed on the docks. This will make it easier for members, guests, and caretakers to clearly identify each assigned boat slip.

We have received reports from several members that their boat propellers have been hitting the bottom in some areas of the marina. Due to the lack of rain, the lake level is currently very low. We are asking everyone to use extra caution when entering, leaving, and operating boats within the marina.

We will continue to monitor the water level and marina conditions and keep members updated as needed.

The marina is looking good overall, and we will continue to make improvements and address maintenance items as they come up.
