

Facilities Report
September 12, 2026

Updates since July 11, 2025

In August a member bumped the gate and knocked it out of adjustment. It was readjusted and works as it should.

There were a several tasks that were completed over the prior couple months:

- 1) The building part of the hut has been painted. The covered area will need to wait until the boats are gone because it needs to be sprayed.
- 2) He has done normal park lawn maintenance, restroom cleaning, emptying garbage, having the hut clean and ready for rentals, weeding the landscape, keeping the launch clear, scheduling hut usage, helping with setup and cleanup taking launch fees and making sure the proper people are using the park and facilities.

Upcoming item:

There were requests to install hot water in the restrooms. The plan is to install a point of connection hot water heater along with new faucets in both restrooms as budget allows. Once I have acquired all the parts, I will proceed with the installation.

As a reminder:

Please make sure if you have guests on your list, that when you fill out a guest slip, you bring your guests to meet the caretakers. This will help them remember who they are letting into the park and will be less of a hassle for your guests. This is a requirement.

Respectfully Submitted

Dan Wolfe, Facilities Chair
